GENERAL PAYMENT CONDITIONS						
All prices ex works (without transport costs), incl. Czech 21% VAT . So the export prices for customers out of Europe are 21% less. Paddles shipped by mail (parcel app. 24 € by the weight), boats by a forwarder. Method of payment: cash on delivery, bank transfer, cheque. The goods are sold with a complete world wide guaranty. Boats respect international rules. Other our boats, paddles, accessories wild water, fitness etc see other our price lists.						
PADDLES						
All blades are made from first-class materials only: epoxy resins, fiberglass, kevlarcarbon or high modulled carbon fabrics. The blades come in sandwich construction, giving high rigidity and strength with a low weight. The Fiberglass and Carbon shafts are used in top PREPREG class only giving high strength, optimal flexibility and low weigh. The CLUB class blades are from the fibreglass with limited carbon reinforcements. They are sufficiently strong for any usual use. Lower mechanic parameters from the fibreglass are partly compensated by its weight. The RACE class blades consist of 45% fibreglass, 45% aramid-carbon, 10% carbon tissue. The rigidity, weight and price offer the best value for money. The ELITE class blades are the top product, made exclusively from carbon tissue and the exceptional epoxy resin L285 . Is the best you can get. By a special order all the mentioned blades can be made with a metal tip or kevlar reinforcement of the tip (wild or shallow water, sea kayaks etc.).						
When paddles are sold assembled (blade joined to the shaft) there is a full guarantee for the joint between the shaft and blade. A guarantee can not be given for the area of the assembly if paddles (blade and shaft) are assembled by the customer. Especially any guaranty is not given in any case if hot melt glue is used as an adhesive.

EASYGEMINI	max 155	145 kg/120-170 cm	650	44	3	Older masters, marathons, sport paddling.
	max 180	74-89/75-90	650	45	3	

* The footrest has a movement range of 15 cm in 10 x 1,5 steps (so 11 positions). The seat has a movement range of 9 cm in 6 x 1,5 cm steps (so 7 positions) except for the Gemini 140 and boats with pin seats. The mentioned distance from the seat to the bar is for the seat in the central position. So the real minimal distance seat- bar can be still 4,5 cm less then the lower mentioned number, and real maximal distance can be still 4,5 cm more then the highermentioned number.

** We can offer an individual solution for Master athletes 95 kg, Cruiser and Easymaster athletes less then 60 kg, Gemini crew around 150 kg.

*** Gemini 140 ony: seats with very long movement range: 13 positions so possible movement 12 x 1,5 = 18 cm. So this boat can be used by bodies 130-175 cm.

* The areas were measured using exact 3D scanning method by Solidvision.cz Ltd., Prague. However an exact area does not show how strong the catch is neither the subjective feeling. For example the strike with ZV is stronger than with M Burton although its area is smaller.

** The choice of the right blades and the length of the paddles depends on age, sex, strength, distances and intensity (from 200 m sprint through racing marathon to all day fitness trip) etc. The length of the paddle must be well chosen especially if a fixed length shaft is used. Adjustable shafts can be lengthened up to 15 cm.
